

Cyber Advisor Service

Strategic cybersecurity guidance designed to **strengthen your security program**

SilverSky's Cyber Advisor Service provides organizations with a dedicated cybersecurity professional who delivers strategic guidance, program oversight, and actionable recommendations designed to improve cyber maturity and operational resilience.

Your assigned Cyber Advisor works closely with your team to understand your risk profile, compliance requirements, network environment, and business processes — helping you assess current services, interpret reporting, identify security gaps, and strengthen long-term cybersecurity strategy.

Strategic cybersecurity oversight and guidance

SilverSky Cyber Advisor Service helps organizations improve cybersecurity visibility, strengthen governance, and continuously mature security operations through ongoing strategic collaboration.

Core Capabilities

Program assessment and benchmarking

Perform baseline cybersecurity assessments and benchmark organizational maturity against compliance standards and industry security frameworks.

Reporting review and analysis

Review, analyze, and interpret cybersecurity reporting to identify trends, operational risks, security gaps, and improvement opportunities.

Ongoing collaboration and advisory meetings

Conduct regularly scheduled meetings, service review sessions, and strategic planning discussions focused on improving cybersecurity maturity over time.

Strategic cybersecurity guidance

Provide ongoing recommendations and strategic direction designed to strengthen cybersecurity posture and improve long-term operational resilience.

Compliance and risk visibility

Develop a deeper understanding of organizational risk exposure, control environments, and regulatory requirements to help align cybersecurity initiatives with business objectives.

Action planning and operational insight

Provide strategic action items, remediation guidance, threat awareness updates, and operational recommendations based on evolving risks and security activity.

With nearly **three decades of experience**, SilverSky delivers a comprehensive portfolio of **Professional Services**, **Managed Security Services**, and **Managed Extended Detection and Response**, combining advisory expertise, security operations, and advanced threat detection **under one roof**.
