Managed Security Services

Our Managed Security Services are an extension of your team's capability. We monitor, detect, and respond to threats across your network, servers, endpoints, cloud, web, and email resources. Our cybersecurity experts manage your infrastructure so you're always current with the latest defenses. Designed to fit your organization, we deliver complete coverage that is relevant and personalized to your business and the threats you face.

The **SilverSky** Value

SilverSky has a history of protecting some of the most highly targeted organizations in the world. Specializing in small and mid-sized businesses in regulated and unregulated industries, SilverSky sets the standard for proactive and vigilant cybersecurity.

Constant monitoring and management

Our cybersecurity experts in our state-of-the-art Security Operations Centers watch over your company 24/7/365 with a combination of advanced technology including threat intelligence, big data, and artificial intelligence combined with human analysis and expertise.

Compliance minded

Our Managed Security Services have been supporting regulated industries for twenty years. As regulatory and compliance issues become more complex and time-consuming, SilverSky monitoring, management, and reporting makes it easier to show your progress and commitment to meeting audit requirements.

Customer focused

We provide cybersecurity from your point of view. We offer transparent business relevant reporting to demonstrate the real value of your security investments. Our trusted cybersecurity experts take the time to really understand your business and priorities.

Managed Detection and Response
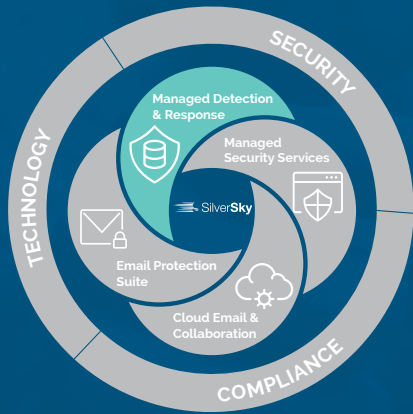

Utilizing advanced threat intelligence, SilverSky is able to identify potential risks sooner by ingesting large amounts of data, combining artificial intelligence along with human expertise to triage security events and provide meaningful remediation advice quickly. SilverSky monitors and manages your perimeter, your servers, and your endpoints to ensure your safety.

The **SilverSky** Value

Acquiring, monitoring and managing MDR solutions can be expensive and time-consuming. Having the appropriate skills to ensure the MDR solution is working effectively and is optimized takes a sizeable investment in personnel and training. SilverSky helps small and mid-sized businesses implement MDR at an affordable price.

Technology that works

Core security devices like Unified Threat Management, Active Directory and Domain Name Servers, and endpoints are configured to send security events to the SilverSky detection platform.

Teamwork

Our analysts correlate and compare data across devices and feeds to provide active response and remediation to assist your team in resolving issues as appropriate.
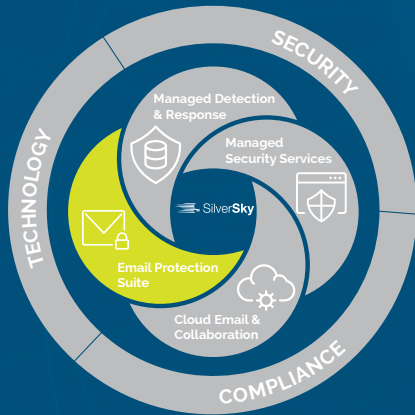

Deep expertise

Our cybersecurity experts monitor and manage your devices giving you early visibility into threats and performing actions to mitigate them.

Email Protection Services

SilverSky offers a comprehensive family of email security solutions that provide end-to-end views of both insider and external threats. SilverSky Email Protection Services (EPS) are fully integrated, easily controlled with a unified and intuitive security management console that provides your team with full security and control over inbound and outbound corporate messaging.

The **SilverSky** Value

SilverSky Email Protection allows your organization to understand where threats are coming from and what actions to take. We help to detect, block and remediate threats before sensitive data gets in the wrong hands. SilverSky EPS includes Advanced Email Protection and Compliance and Information Protection features.

Advanced Compliance

Regulatory compliance is complex and challenging to meet. SilverSky provides security solutions for email encryption so your users can send secure, encrypted messages to anyone, no matter what email system they use. This security supports your compliance efforts for sensitive information. Email compliance archiving allows your company to review, discover, and audit your electronically stored communications improving accuracy and efficiency. Our content-aware policies help guard against insider threats and data extraction attacks.

Advanced Email Protection

Email is the most attacked vector in any IT environment, and over 90% of cyberattacks are delivered through email. SilverSky offers a highly advanced service that protects your organization from targeted attacks, including malware, ransomware, and spear phishing. We also protect your users from being exploited by social engineering attacks such as business email compromise, whaling, and CEO fraud.

Flexibility

SilverSky email protection solutions are flexible enough to work with Office 365, Gmail, and other email systems. Whether your email system is on-premise or in the cloud, SilverSky EPS will keep your users and your organization more secure from email threats.

Cloud Email & Collaboration

For many companies, email, office productivity, and collaboration tools have opened new threats to their cybersecurity. Criminals know confidential data, personal information, and intellectual property flow through email every day and they see email as a treasure trove. At the same time, managing on-premise Exchange environments can be time-consuming and costly.

(diagram labels:) SECURITY · TECHNOLOGY · COMPLIANCE · Managed Detection & Response · Managed Security Services · SilverSky · Email Protection Suite · Cloud Email & Collaboration

The **SilverSky** Value

Silversky Cloud Email and Collaboration helps business move to the cloud by providing Exchange email, Mobile Device Management, Skype, Sharepoint, and other O365 Business apps layered with advanced security and compliance packages.

Always-On Monitoring

Your email is secure with our trusted Security Operations Center staff monitoring your email environment to identify potential threats and providing remediation actions when needed.

Productivity Tools You Need

SilverSky enables your users with the productivity, messaging, communications and mobile workstyle tools to increase your team's efficiency and satisfaction without additional overhead.

Advanced Email Security

Key security features including targeted attack protection and social engineering protection reduces risk for your company and employees.

Compliance & Info Protection

To aid in your information protection and compliance efforts, your email is encrypted and data loss prevention tools are deployed to ensure your data remains secure.

Incident Readiness and Response

SilverSky has over twenty years of experience at the frontlines of cybersecurity - helping our customers prepare for, contain, and recover from even the most sophisticated cyber attacks. We understand that the remedial actions taken in the first few hours after an attack will greatly affect the eventual outcome.

The **SilverSky** Value

Managing a response to an cyber incident is a complex task that involves the coordination of many decisions, resources, tasks, and information. Our Incident Readiness and Response services give our customers the ability to respond rapidly and effectively to cyber attacks. We provide two types of service:

Readiness assessment

- Designed to measure the effectiveness of existing response plans, tools and resources.
- Develop a clear understanding of your organization's current ability to manage major cyber incidents and have clearly documented risks and plans for improvement to support compliance requirements.

Readiness improvement

- Design, build and deploy comprehensive and enduring incident management capabilities.
- Your technical teams and business decision-makers will have the training and confidence to respond effectively to cyber incidents and your risk of implementing a counterproductive response will be significantly reduced.

Compliance and Risk Services
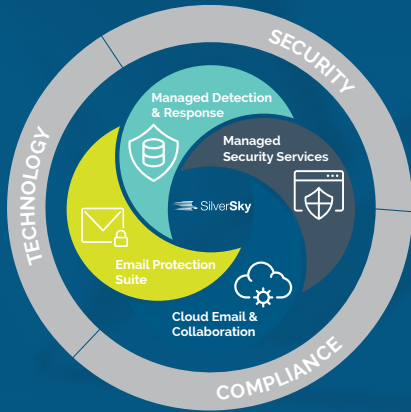

SilverSky has an outstanding cybersecurity consulting practice. We provide expert compliance and cybersecurity advisory services to understand your organization's risk exposure and assess, test, and improve your cybersecurity program. From risk assessments, to penetration testing, and incident response readiness, we have the expertise to make your security plan even better.

The **SilverSky** Value

Our advisory services are rooted in a heritage of protecting regulated commercial organizations. This means we understand how to make people, process, and technology work together. We do this by:

Understanding your business

We understand your intricate network, key assets, processes and procedures, risks, regulators and stakeholders.

Making intelligence relevant

By weaving your business risk and threat intelligence together, our testing results and recommendations are tailored to your unique needs, consumable and highly useful across your organization.

Assessing and qualifying risk

We understand your risks and can deliver personalized services for your business, reducing your risk, and helping you achieve compliance with regulations.

Trusted Cybersecurity for an Uncertain World

SilverSky offers a comprehensive suite of products and services that deliver unprecedented simplicity and expertise for compliance and cybersecurity programs.

We partner with thousands of small and medium-sized businesses to deliver Managed Security Services, Managed Detection and Response, Email Protection Services, Cloud Email and Collaboration, Incident Readiness and Response, and Compliance and Risk Services to support their technology, compliance and security needs.

By tirelessly safeguarding your most important data and the complete surface area of your IT infrastructure, **SilverSky** enables growth-minded organizations to pursue their business ambitions without security or compliance worries.
