Unlock the Power of Productivity and Security

Microsoft 365 E3 is a suite of productivity and security tools designed to help small and medium-sized businesses operate effectively and securely. This solution includes Office applications such as Word, Excel, and Outlook, combined with Exchange, OneDrive, and SharePoint services.

SilverSky wraps these tools with a fully managed Email Protection Service for all your employees and extra Business Email Compromise protection for your executive leadership team.

Key Features

- **Advanced Security Management:** Protect your business data and devices from cyber threats with Intune for mobile device management, Entra ID Premium for identity security, and Windows Defender for threat protection.
- **Tailored Identities, Roles, and Access:** We configure the identity and role-based access controls for your unique business. Define proper controls for online and offline access.
- **Increase Security for Critical Employees:** Powerful email, endpoint, & identity protections with global threat detection for all users and extra protection from highly targeted attacks on your leadership team.
- **Expert Support and Maintenance:** We ensure your environment is always up-to-date, secure, and running smoothly with regular configuration & security updates, real-time monitoring, and proactive remediations.

- **Productivity Tools**: Access the full suite of applications and services, enabling your team to collaborate and work efficiently from anywhere.

Benefits

Transform Your Business

This Power Package provides a solution that evolves with your organization and allows you to customize your security and productivity tools to match your unique requirements without compromising performance or functionality.

Expert Support and Maintenance

Enjoy the benefits of regular configuration and security updates, monitoring, and automated remediation, ensuring your systems always run smoothly and securely.

Reduce IT Burden

Allow your IT staff to focus on strategic initiatives and innovation rather than routine maintenance and troubleshooting.

Advanced Threat Protection

Combining Email Protection from social engineering, data loss, and targeted attacks allows employees to use Microsoft tools confidently. Robust identity and conditional protections help protect against Business Account Compromise. Business Email Compromise helps safeguard your most critical and frequently targeted staff members. Our solutions offer the flexibility to adapt to your business demands.

Elevate Your Business Today

Embrace the future of work with this powerful combination. Enjoy the peace of mind that comes with advanced security, the convenience of cloud-based productivity tools, and the support of expert service. Transform your organization with a scalable and flexible solution that ensures you remain effective and relevant, no matter your industry or size.

> **Business Email Compromise (BEC)** is an email cybercrime attack where a malicious actor targets an organization by compromising legitimate business email accounts, usually through social engineering or phishing scams, to manipulate the organization into transferring funds or sensitive information to the attacker. These attacks are often sophisticated and involve thorough planning and research into the targeted organization's operations and key personnel. BEC can lead to significant financial loss, data breaches, and damage to an organization's reputation. Robust email protections, especially for critical employees and executives, are essential to safeguard against such threats.
